### Heartiest message the International community

### Through the bottom of Sri Lanka heart

The mission done  
Anyone can be  
Asked by  
the Sunrise   
  
I also done  
as much as I can  
expressed the gratitude  
a small lamp 

The current economic crisis in Sri Lanka has put a lot of pressure on the rural as well as the urban population. We are constantly experiencing the pain that comes from the hearts at the people who work there.

We are confident that the current economic crises will be resolved in a short term, part time and long term manner so that the local economy can move forward in a short - term and long term relationship with the local and International community as soon as possible. Although it was claimed that the crisis started in 2019, the views of our people and the rural crowds were to borrow at high interest rates and sell local resources at a very Low price without proper utilization. We see the fall in gross domestic product and the sharp decline in exports as the main reason for the decline in foreign exchange.

The achievement of ideas and financial strategies by NGOs and private sector in the richest and developing countries to the world through the state apparatus in each country has been a key factor in their development. NGOs(working at the village level) in our country have so far not received any suggestions on governance in any government.

Many skilled and intelligent people with social experience are looking at NGOs that have been built on a social task and that past and present government are spinning a blind eye to NGOs.

The time has come to change the administrative structure of the Ngo's National Secretariat, which is based solely on annual planning reports.

In this regard a systematic program should be formulated to provide more effective guidance to NGOs and to enable NGOsto maintain Local and International relations and attract foreign exchange in to the country.

- **Sri Lanka JathikaSamajaSewaSanvidaya L07301**

## **Sri Lanka National Social Service Organization**

It is the only NGOs in Sri Lanka registered at the provincial Level on 01/10/1997 and registered with the National Secretariat for Non-Governmental Affair on 20/03/2000.

This is due to the fact that government act no 31 of 1980 was amended in 1998 and amended to place all NGOs is allowed to use the name Sri Lanka National.

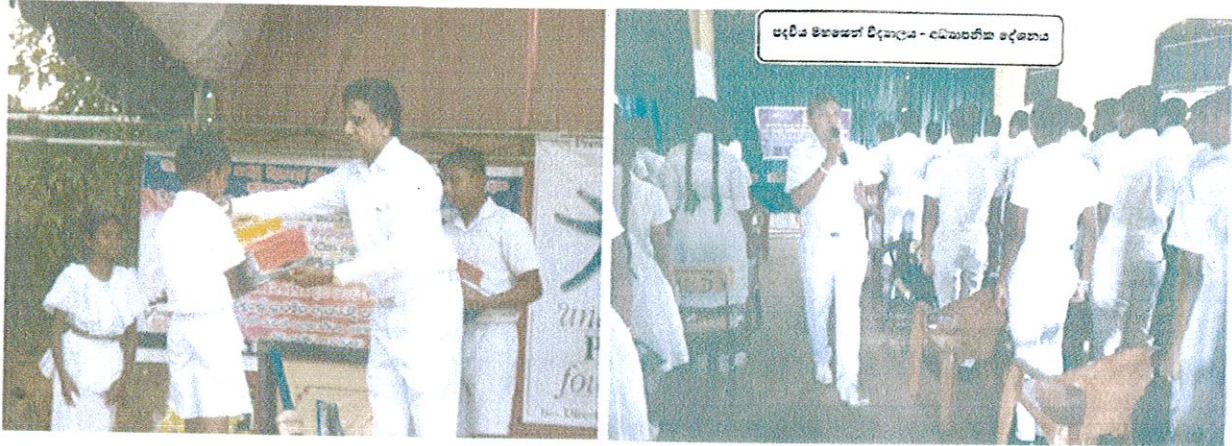

The National Social Service Organization of Sri Lanka has made a tremendous role of our country for nearly Twenty five years (25) and is still active today.

The economy of a country is strong only if the people of the country are intelligent. Therefore our main objective is to lead this organization under the leadership of the Hon.Chairman to enter and bright society by nurturing the education of the children of Low income families in Sri Lanka.

The following educational Project are being implemented for this purpose.

- 1) **SisuNenaUdana**
- 2) **A guide to student wise life**
- 3) **You the of Education Sri Lanka**

## 1) SisuNenaUdana

The majority do not retaliate against the existing education system in Sri Lanka. However due to the need of the rulers and the popularity of the majority. The respective ministers made educational changes.

A school child should pave the way for education for the first year tot the fifth grade and in our country. Not only the child but also the Parents should spend more time on the fifth grade shoplifting examination on the Provision of an education that destroys the minds of the children. There is enormous damage to vision.

The main objective is to provide the following grade 6 to grade 12 and to direct the children society towards education and to create a working intelligent person who will step out of thru intelligent youth society. As the same time educational lecture on “where is the future of the children of the nation” will be conducted with the aim of directing the minds of the children to proper education.

- 1) School shoes
- 2) 12 books of 200 pages
- 3) 06 Books of CR (grade 11 to 12)
- 4) School bags
- 5) Pen and pencil

## Assistance to SisuNenaUdana Educational Project

This Program has been implemented with the help of local Philanthropists for Nearly 25 years.

The severe and global epidemic that hit the country from 2019 to the present has left the Local business community helpless as the country's economy has been severely inactive.

As a result, the implementation of our projects was somewhat reduced. In such a case, it is the responsibility of the Non-Governmental National Secretariat to provide the necessary infrastructure to maintain cooperation with the International community for such good Projects.

## 2) A Guide to student wise life

Doing things that are not talked about by the most talked about NGOs in the Sri Lanka Society by releasing a large number of school children through the Drug movement that is dragging. Not only the rural people but also the entire youth community in to the world of education by enabling them to get a proper education.

The vast majority of urban Semi-urban, and rural people are addicted to drugs and the number of suicides is the same as number of families whose lives are ruined.

By rehabilitating these families with the discreet wisdom of the Chairman of our Organization. We will secure the environment necessary for those families to live in a manner that is not a burden to the country and society and to make a full contribution to the education of the children of those families.

At the same time, School children who are addicted to drugs are taking full responsibility through our organization to carry out educational activities through this project a good intelligent Society is being created.

The whole world has not only acknowledged that the future of a prosperous world society is in the hands of our young generation. But is poised to put in the place necessary intelligent mechanisms behind it.

Today some countries have developed rapidly due to the young intelligentsia creatively strengthening their economies with ideas for the modern world.

Therefore, our main objective is to educate the children who have completed their education and vocational training courses. To direct them to those courses, to direct them to vocational training courses, that suit their educational knowledge, to provide them with the necessary basic facilities and to integrate them in to an intelligent society.

With the employment of such youth in public and private institutions and the strengthening of the family economy. It has made a tremendous contribution to the national economy through with the noble aspirations of the youth are being nurtured, Properly managed socialized and made true citizens.

**\* Let's Awaken the heartbeat of the people internationally**

Our survey has revealed that today our country is facing a very serious foreign exchange problem and the people as a whole are deeply exasperated and angry over those problems.

The whole country is in a dilemma as a result of this foreign exchange crisis which has led to a severe crisis for the following services.

- 1) Power outage**
- 2) Loss of fuel**
- 3) Loss of gas**
- 4) Shortage of medicines in Hospitals**
- 5) Loss of educational equipment**
- 6) Rising commodity Prices and difficulty in obtaining goods.**
- 7) Loss of employment**

The country has not been subjected to such a crisis during the nearly 30 years of war.

The loss and scarcity of the basic necessities of life for human beings has become an unbearable pressure on the country and the people in this case, the appointment of committees to look in to the causes at the severe economic crisis a waste at time and a deepening abyss.

NGOs (those who render silent service at the rural Level) should unite and move towards a speedy program to strengthen the Governance that is accountable to all Sri Lanka communities.

To this end, our organization makes the following Proposals. It is possible to get some relies by giving all together, Including the head of state.

- 1. Intervention and supervision of his Excellency the President.**
- 2. Awareness of all Ambassadors in Sri Lanka and obtaining proper assistance for this work.**
- 3. Arrange for overseas travel to meet Sri Lankan Living abroad and to gain the support at the masses.**
- 4. Raising awareness among the International community through NGOs and breaking the mistrust of Governance and strengthening confidence and bringing in foreign exchange.**

The world community is deeply saddened the current situation in Sri Lanka. We believe the foreign aid can be obtained through a full-fledge Programm to Awaken the minds of the masses by making proper use at that sympathy.

Accordingly, the lives of the people of Sri Lanka can be restored and for that the ambassadors of the following countries should be consulted and the advice and knowledge of many should be sought to visit those countries and obtain the necessary immediate assistance. The requirement of the full involvement of NGOs and Government Sponsorship.

- 1) America**
- 2) Canada**
- 3) European countries**
- 4) British**
- 5) Switzerland**
- 6) Asian Countries**

Through this project, the educational children do not have the necessary equipment and books at present and the project seeks assistance for that. As the majority of the rural population in Sri Lanka lives on wage labor. It is not possible to provide a nutritious meal to their children at today's prices.

Therefore, child malnutrition will increase very rapidly.

I would like to remind you that the following material assistance is urgently needed in the rural difficult areas at Sri Lanka such as Mullaitive, Vavuniya, Monaragala, Badulla, Rathnapura, Kalutara, Galle and Matara.

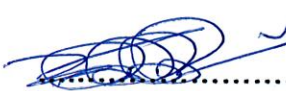

1. School Shoes (DSI)
2. School Bags
3. 200 pages of School Ex Books
4. C.R. Books (Grade 11 up to)
5. Computer Machines (for computer training courses)
6. Essential Medicines  
(On the recommendation of the ministry of Health)
7. Essential Milk Powder.
8. Nutritious Food

The above mentioned materials are currently facing severe shortage in Sri Lanka due to severe shortage and high prices.

Even the world health organization recognizes that children need medicine and nutritious food in parallel with education.

If the Government of Sri Lanka and all the foreign Ambassadors in Sri Lanka and our Ambassadors representing each and every country fully contribute to the implementation of this Project the people of Sri Lanka will not be too charitable to produce a healthy Generation of intelligent and Civilized People.

Thank you.
